Education

- **SVNIT Surat** — Surat, Gujarat
  B.Tech in Electronics and Communication Engineering; CGPA: 8.34/10 — *2021 – 2025*
- **Scholar English Academy**
  Higher Secondary (Class XII); 93% — *2021*

Honors and Awards

- **CII National AI Award–Excellence in Best Industry AI Application** (2025)
  Received from Confederation of Indian Industry (CII) for developing and deploying a high-impact AI solution that optimised industrial processes and delivered major operational improvements.
- **Small Improvement Projects (SIP) Award** (2025)
  Awarded **thrice** with cash prize for implementing innovative and practical solutions that significantly improved daily operations, streamlined routine tasks, and enhanced efficiency, productivity, and workflow satisfaction for employees.

Experience

- **Banas Cooperative (Amul Group)** — Palanpur, Gujarat
  IT Executive — *July 2025 – Present*
  - **Banas Dairy Website – Official Website (live site)**: Built and led development of the **Banas Dairy** website (banasdairy.coop), including a custom **CMS Admin Panel** enabling non-technical staff to dynamically manage the website. Optimized asset delivery and caching to cut average page load latency by roughly **80%**, sustained ∼**99.6%** uptime post-launch, and garnered **20,000+** total visitors within the first **2 weeks** of launch.
  - **KPI Management System with Real-time Dashboards**: Developed web-based KPI tracking platform for real-time monitoring of **15+** production parameters across **multiple plants**. Enabled CSV data uploads, daily entries with root-cause analysis, action plans, target revisions, remarks, and interactive charts. Reduced manual reporting time from **1-2 hours** to **less than 5 minutes** in daily meetings via live dashboards and presentation mode. Accelerating management decisions, risk mitigation and daily insights
  - **Banas Bhoomi Amrut (live site)**: Built and launched **Banas Bhoomi Amrut**, a scalable web platform initiated by **Banas Dairy** to serve as a comprehensive resource hub for fertilizer products, including detailed specifications and usage guidelines. Drove a ∼**35%** increase in monthly active farmer visits and cut average query resolution time by roughly **30%**.
  - **Banas Live Dashboard (live site)**: Designed and built the **Banas Live Dashboard**, a centralized real-time monitoring platform aggregating live operational data across **milk collection, production, and sales** from **SAP RFC's** for management-level visibility. Delivered continuously refreshed, cross-plant metrics that replaced manual, delayed reporting cycles, cutting decision turnaround time by roughly **45%** through instant, data-driven insight.
  - **Banas AI Intelligence Platform – Analytical Chatbot & Prediction Tool**: Co-developing the **Banas AI Intelligence Platform** – a voice-integrated analytics chatbot (**Caddie**) and a multi-level demand/procurement **Prediction Tool** spanning Milk Collection, Veterinary, Production, Sales, and Cattlefeed modules – alongside an external vendor team. Personally engineered the **SAP RFC to PostgreSQL** data pipelines powering both tools, supporting chatbot responses **under 2 seconds**, ∼**92%** forecasting accuracy, and **MAPE** of roughly **6%** across **88** districts and **5** plants.

Projects

- **Task Management System (Workflow & Multi-level Approval Platform)**: Developed a robust workflow system for tasks with multi-level approvals, real-time status tracking, budget allocation, task and subtask assignment and report generation (PDF/CSV) ensuring better team productivity. **Tech stack:** ReactJS, Node.js, Express.js, PostgreSQL. GitHub
- **Banas BMC Service Mobile App (Play Store)**: Built as a mobile app for field technicians with a web admin panel for ticket management and analytics, digitizing BMCU service records across dairy societies. Enabled equipment tracking, complaint ticketing, preventive maintenance, photo verification, and **OTP** checks, cutting technician response time by roughly **60%**. Added audit-ready invoicing and analytical insights, crossing **100+** downloads in **1** week.
- **Cloudinary-based Media Storage SaaS Application**: Created a scalable media storage SaaS supporting multiple uploads with automatic compression, resizing, and format optimization. Reduced average file sizes and improved page load times. **Tech stack:** Next.js, TypeScript, Prisma, PostgreSQL, Cloudinary, Clerk Auth. GitHub

Technical Skills

- **Programming Language**: Java, Python, SQL.
- **AI & GenAI**: Machine Learning, Generative AI, RAG, Agentic AI, LangChain, LangGraph.
- **Frontend Development**: HTML, CSS, JavaScript, ReactJS, Tailwind CSS, Bootstrap.
- **Backend & APIs**: NodeJs, ExpressJs, Fast API, REST API.
- **Databases**: PostgreSQL, MongoDB, MySQL, Vector DB.
- **Core Computer Science & Tools**: SAP RFC Integration, DBMS, OOP, Computer Networks, IIS.
